QIHAN INTRODUCTION

QIHAN INTRODUCTION

About us

About QIHAN

Since its establishment in 2006, QIHAN Technology Co. Ltd., based on extraordinary product quality and strong R&D capability, has become global leading CCTV surveillance equipment and solutions provider. Located in Shenzhen, the "East Silicon Valley", with 50,000,000 RMB registered capital, QIHAN built its 10,000 SQM area advanced automatic manufacturing center. QIHAN invests over 10% sales amount to technical research and development yearly, and owns more than 100 patents based on Machine Vision Recognition, Multi-axis Automatic Control, and Big Data Analysis, etc. With foothold in China and facing the whole world, QIHAN owns Qihan, Sanbot, Donkey and Qihan Cloud four proprietary brands, devoted itself to each family for feeling intelligent technology and enjoying the life.

QIHAN INTRODUCTION

About
us

Our Goals

"Creation for Intelligent Life", QIHAN people are working constantly to improve the product quality; constantly provide innovative product, reliable quality product and competitive prices; constantly improve the quality of life for all users and have them enjoy more life pleasures. Through providing interconnection of H2H, H2T, and T2T, with open and win-win cooperation attitude, QIHAN welcomes worldwide partners to work together to make a better world.

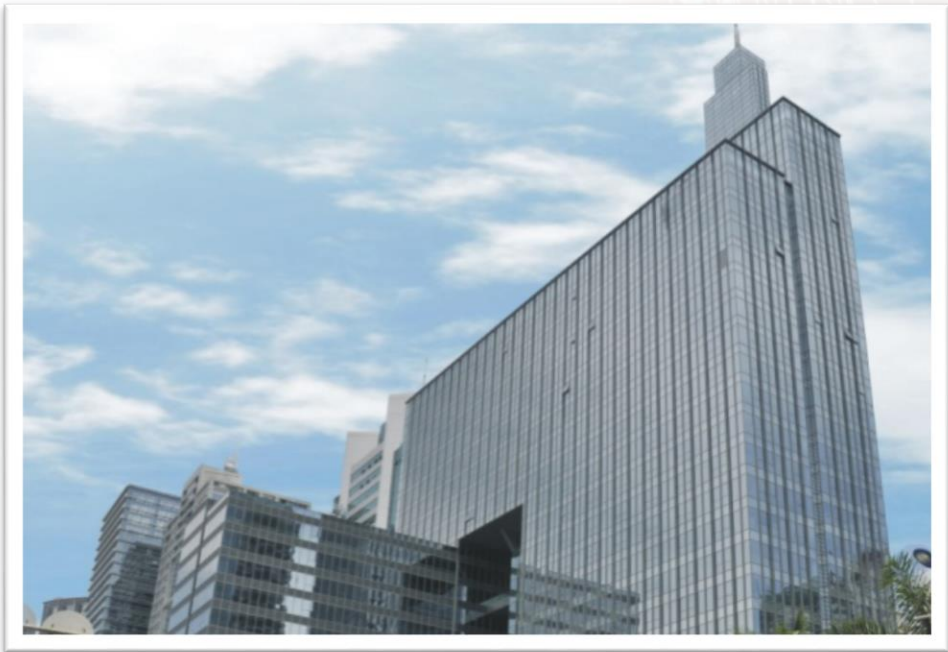

About
us

Brief Information

- Based in Shenzhen, China
- Leading Provider of A/V equipments
- Registered Initial Capital: USD 8 million
- Over 400 Employees: 100+ R&D Engineers, 60+ International Sales & FAEs
- 2016 Target: Over 40% Growth Rate
- Production Capacity: 400,000pcs Cameras 50,000pcs DVRs per month
- 10,000SQM Manufacturing Center, 24 Production Lines
- 2015 Turnover: USD 62 million, 20% Growth Rate

QIHAN HEADQUARTER

Owning **300** skillful workers and **100** experienced R&D engineers, QIHAN set up the Postdoctoral Innovation Experimental Base and was assessed as the China High-tech Enterprise. Quality is the life of enterprise. QIHAN R&D center received the certificate of CMMI III from the US Department of Defense, and introduced IBM IPD R&D Process System in 2014. QIHAN expanded its R&D Base to 3,000 m² in 2015 and set up the Optics Laboratory, Reliability Testing Laboratory, QIHAN Research Institute and Internet Big Data Center.

QIHAN IP Camera Advantages

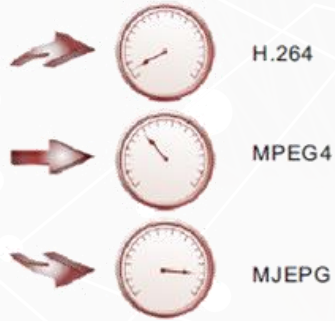

H.264

H.264 High Profile/MJPEG, Low-streaming
High-image quality

1920x1080@30fps

Security

https, 802.1x, AES and watermark

HTTPS

HTTPS provides authentication of the website and associated web server. It provides bidirectional encryption of communications between a client and server.

802.1x

The IPC is not allowed access through the Switch to the protected side of the network until the IPC's identity has been validated and authorized.

AES

Use the AES to encrypt the data transmission over network, decryption requires secret key.

Video watermark

Embedded information in each frame
Protecting Video from interpolation.

Secure login

IPC is not allowed login when the MAC and IP haven't the authority.

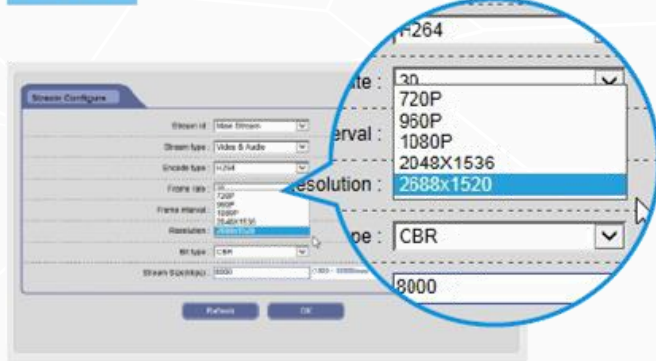

RTSP Authority

Add checking user permission during RTSP request.

Downward Compatible

4MP IP Camera also downward compatible
with 3MP/2MP/1MP device

WDR@120dB

ROI

Region of interest in an image with low compression ratios to get a better image effect, while the other part uses high compression to save storage space. The ROI encoding can without losing important information while effectively compress the amount of data.

ONVIF V2.4

Support Onvif V2.4 & Onvif Profile S

360° Fish Eye Camera

Features:

- 5 Megapixel CMOS Sensor
- Real Time H.264/MJPEG Video Compression
- 1.4mm Fisheye Lens for 180° Panoramic View and 360° Surround View
- $\pm 15^\circ$ Tilt Wall Mount Bracket
- DWDR
- E-PTZ Control
- Built-in IR Cut for True Day and Night
- Two way audio
- Built in Micro SD/ SDHC/ SDXC Slot
- 3DNR
- ONVIF

Application:

QH-NF501 equipped with a fisheye lens for 180° panoramic view (wall mount) or 360° surround view (ceiling/floor/table mount) without blind spots, the camera is able to provide coverage of wide, open indoor areas, such as airports, shopping malls, train stations, retail stores, offices and more.

- H.265 video compression
- Third-party IP cameras supported with ONVIF conformance
- Support PnP for easy IPC discovery and usage
- Up to 8 Megapixels resolution recording, storage and playback
- Support up to 16 channels POE
- Support 2-ch HDMI, HDMI2 is up to 4K(3840x2160) resolution
- Up to 16 channels synchronously playback
- Support instant playback
- Support corridor mode
- Support 4/8 SATA HDDs, up to 6TB for each HDD

Diamond SERIES/Network Video Recorder

- Support 8MP/6MP/5MP/4MP/3MP/1080P/960P/720P Resolution Recording/Preview/Playback

- 4CH/8CH/16CH/32CH/64CH Optional

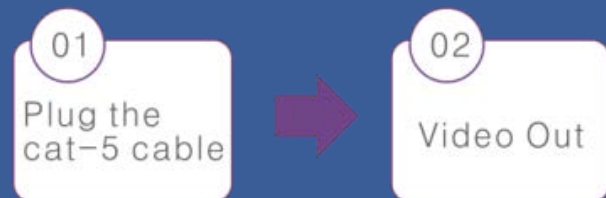

- Support 300 meters long distance transmission by POE

300 meters long distance transmission

- Support POE Plug & Play

- Support P2P

- Support ONVIF 2.4

Diamond SERIES/Network Video Recorder

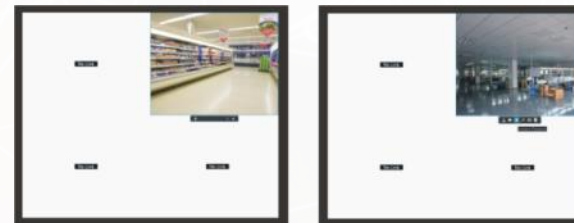

➤ Record Clipping Function

You can choose the starting/stopping position of the video clip by clicking the desired location on the time bar to backup during playback.

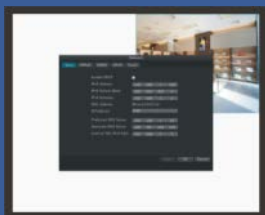

➤ Instant Playback

Allow users to see what was happening in the live view.

➤ Maximum Transmission Unit

The value of MTU is configurable to adapt to different network environment

➤ Support HDMI & VGA 1080P output simultaneously

➤ Support DDNS, quick access

➤ Support UPnP/NTP/DHCP/PPPoE

Diamond SERIES/Network Video Recorder

- Support access by App and Android and Tablet

ISS Mobile

Android

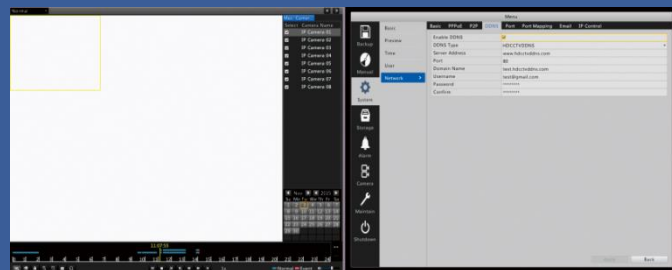

iOS

- Support 1/2/4/8 SATA interfaces, up to 6TB for each HDD

- The operation interface

- Support corridor mode

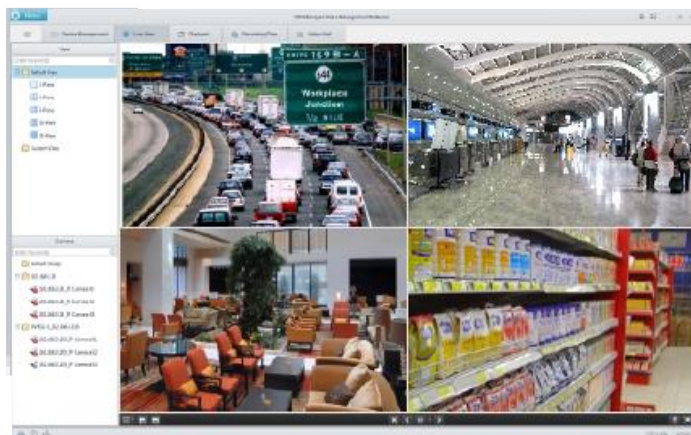

It supports rotating picture for 90° and expands the monitoring range to satisfy the vertical occasion such as aisle and tunnel.

- More Network Equipment Compatible

Diamond SERIES/Network Video Recorder

ISS Manager

- Intelligent Surveillance System Max256 devices or 1024 channels connection;
- Support multi-screen and 64*5 windows Max 16-channel synchronization playback;
- Support snap shot, record, E-map, video wall and etc.;
- Support stream media server, each server max receives 16-channel video and transfers 32-channel Video;
- Support record server, each server max supports to save 16-channel video.

AHD PTZ

Meet Your Every Desire

AHD DVR:

AHD DVR: 1080N, 1080P, 4CH, 8CH, 16CH, AUDIO, ALARM

AHD Camera:

720P, 1080P, BULLET, DOME, INDOOR, OUTDOOR

AHD PTZ:

720P, 1080P, 4", 6", 7", 22X, 37X

AHD System key features

» Upgrading to HD System

It is easy to update the old system without changing the existed wire.

» UPNP(Universal Plug & Play)

Support P2P cloud service, One step to do remote monitoring without any complicated setting.

» 720P/1080P High Definition

With modern AHD technique, up to 720P/1080P Live view, Record and Playback.

» Good compatibility

Backward-compatible D1/960H, Good compatibility with analog peripheral unit including Video Splitter, Matrix and so on.

» Hexaplex

Multi-operation simultaneously: Preview, recording, playback, backup, network live, smartphone monitoring.

» High Quality And Inexpensive

Enjoy High definition products in analog's price.

» ISS

This is an Intelligent Surveillance Software With powerful function and Distributed Architecture

» P2P Cloud function

» Remote Access

Remote Access from Smartphones
Simple and easy the perfect

AHD 2.0 Tribrid 1080N/1080P AHD DVR

» Features AHD + Analog + IP

- Support record with 1080N (960*1080) resolution, which will save half of the HDD disk space compares Revolution of FHD Surveillance
- Low Storage Cost: 1080N = 1/2 1080P
- High Image Performance: 1080N = 1080P

- High Frame Rate: HI3521 , 1080N@30Fps = 1080P@15FPS
- 4/8 channel synchronous playback
- Support free DDNS HDCCTVDDNS
- Support UPnP, NTP, DHCP, PPPoE, RTSP
- Support 1 or 2 SATA HDDs, each HDD is up to 4TB,2 USB2.0
- Up to 500 meters long distance stable and high quality 1080P video transmission

» AHD and Analog input are Self-adaptive

» Hybrid AHD DVR, Support AHD, Analog and IP Video input

» Third-party IP cameras supported with ONVIF V2.4 conformance

» Support P2P & Mobile app access

Make control Easier than your imagination!

ISS is an intelligent Surveillance System that offers an easy-to-use, highly reliable and feature-rich software for security management and integration of all Qihan products. ISS will enable you to quickly set up an effective video surveillance system.

Features

• Previews

Quick access to live video from any camera or any channel. View up to 64 channels per screen
Support multi-screen touring

• Record and playback

Support manual/scheduled/alarm record, user can easily find recordings by time/event.

• Device and user management

ISS can manage more than 1000+ devices in local or remote network.
Define any authorities for any users.

• Alarm and log

Access control(alarm I/O) and rich alarm linkages make ISS works as a powerful security guard

• Supported devices

Support all our Qihan product lines(DVR,NVR, HD DVR,IP Camera) ,all in one system.

ISS Mobile 2.0

ISS mobile 2.0 is the best app for Qihan remote surveillance, control and video recording. Monitor your home, office, parking area, traffic, business or anywhere you need security.

Features

- Support all Qihan products, DVR/NVR/IPC/IP PTZ
- Control and view up to 16 channels simultaneously
- Support remote playback, snapshot and local recording.
- Support two way audio, alarm notification, PTZ control, Alarm I/O control
- Support two streams, main stream and sub stream.
- Support digital zoom, auto rotate video and gesture control.
- User password authentication

operación remota de los elementos, como encendidos/apagados, configuración o *setting* de los sistemas, entre otros beneficios.

7. ¿Quién administrará el dispositivo?

Siendo el último ítem, pero no el menos importante, ¿quién es la persona o grupos de personas que administran los dispositivos audio visuales? El diseñador debe analizar el conocimiento tecnológico de la persona o cargo que operará el sistema. El ejemplo clásico que se ve en gran cantidad de proyectos es que el diseñador selecciona una consola análoga para la operación, pero el operador tiene conocimientos limitados de audio.

En este artículo se expresaron algunos puntos críticos frente al diseño de audio distribuido. Invito a los lectores a que tomen los diferentes cursos ofrecidos por los entes de diseño, que analicen las normas locales e internacionales y que escriban si tienen dudas o desean que se profundice un poco más sobre algún tema específico. 📌

QIHAN 3MP True WDR 8" Camera

What is WDR?
When shooting in high contrast, backlight, glare and light reflection environments such as the entrance, ATM or the window side, the object will appear dark and unrecognizable. WDR technology can ensure an identifiable image of all objects under such conditions by appropriately exposing the entire scene, both the darkest and brightest parts.
